Dear Sirs,

Following on from the request made by Los Mochis plant of CDF group regarding the authorisation of the product described below and based on the support information provided and compliance with the requirements established in the 'Procedure for authorisation of processing aids', an **authorisation is hereby granted** for the product under consideration to be used in the bottling plants of the Mexican Division.

Description of Product	Product for Disinfection
Name of Product	TwinOxide
Manufacturer	TWINOXIDE INTERNATIONAL BV
Supplier	Clarimex S.A. de C.V.
Application	Water treatment

The authorisation granted hereby is subject to the following:

- The product shall not be modified in its original components or physical-chemical characteristics (indicated in the technical data sheet). Any changes in the formulation shall be immediately informed to Coca-Cola de México.
- Each delivery of the product shall be accompanied by a test certificate issued by the supplier.
- The maximum concentration allowed for the use of this material is 0.3 ppm.
- Monthly monitoring shall be carried out regarding the physical-chemical behaviour of the water for 3 months. The results shall be assessed by Coca-Cola de México.

This authorisation **does not constitute a purchase recommendation** in favour of this product. The decision to buy this or another authorised product solely and exclusively depends on the bottling company.

The product shall be included in the list of processing aids authorised by the Division. While this is in progress, this letter is the supporting document that evidences the authorisation.

The supplier shall submit the testing techniques for their reception, as well as the safety data sheets of the product, to each bottling plant that uses it.

Kind regards,

José Luis Godoy Atala
Development and Authorisation of Suppliers
